VIGNESH PANDIAN R
FRONT END DEVELOPER

Graduate of Information Technology with experience working across the Front End developer of Website. Looking for a role where I can grow and learn from experienced team members while drawing on project experience I have already successfully executed.

PROJECT EXPERIENCE

Swimming pool
State Level Project (Live time project)
2024 — PHP

- This project is designed only for the admin side .
- It includes a list of competitions, schedules, and separates participants into schools and colleges, and further by age groups.
- It calculates the overall results for each category and the overall results for each college. Finally, it converts the list into a PDF.

Crackers Purchase Software
2024 — Angular & Nodejs

The system is developed using Angular for the front-end and Node.js for the back-end. It includes both admin and user functionalities to ensure efficient management and smooth user experience.

- Email Notifications: After a purchase, the system sends the details to the user's personal email for confirmation and record-keeping. (User Side)
- Stock Calculations: The system calculates and updates stock levels automatically after purchases. (Admin Side)

Billing Software
2024 — Angular

Pharmacy project(Currently working part-time at a company)

- That company provides some modules for me to create.
- The modules are Supplier Settlement, Daybook, Ledgers, Accounts, and Reports part.

Mcq Test
Online Test (II year Project)
2023 — PHP

- The aim of this project is to computerize the current manual system, saving examiners time and protecting important data.
- It ensures long-term data storage and easy accessibility.
- This project helps examiners manage their tasks efficiently and provide better service to users.

Chat Bot
Collage Project(III year Project)
2024 — PHP

- A chatbot project involves building a program that can chat with users, answering their questions and helping with basic requests.

INTERNSHIP
2024

UI /UX Designer
Work in an office environment (38 Days)

- This project focuses on redesigning the user interface (UI) and user experience (UX) of a mobile app to make it more intuitive and engaging. The goal is to improve user satisfaction and retention by fixing usability issues and enhancing the app's visual appeal.
